

# Custom Print Shop Management & Web-to-Print SaaS Platform Proposal

*(Inspired by Industry Platforms such as DecoNetwork)*

---

## 1. Executive Summary

This proposal outlines the development of a custom enterprise-grade print shop management and web-to-print SaaS platform designed for apparel decorators, print shops, embroidery businesses, and fulfillment companies. The platform centralizes online stores, product customization, quotes, orders, artwork approvals, production workflows, inventory management, shipping, accounting, and analytics into a unified cloud-based system.

## 2. Core Platform Modules

- Business Management Hub
- eCommerce Store Builder
- Online Product Designer
- Quote Management System
- Order Management System
- Artwork Approval Workflow
- Production Management System
- Inventory & Supplier Management
- Payment & Billing System
- Shipping & Fulfillment
- Accounting Integrations
- Reporting & Analytics
- SaaS Multi-Tenant Architecture
- AI-Assisted Enterprise Features

## 3. Key Features

The platform will support:

- Multi-store SaaS operations
- Custom storefronts and team stores
- Interactive product customization
- Automated quote-to-order conversion
- Production job tracking
- Stripe payment integration
- Inventory and supplier syncing
- Shipment tracking
- Accounting integrations
- Enterprise analytics dashboards

## 4. Recommended Technology Stack

Frontend: Next.js + TypeScript

Backend: NestJS / Node.js

Database: PostgreSQL

Queue System: Redis + BullMQ

Storage: AWS S3

Authentication: JWT + RBAC

Payments: Stripe

Real-Time Features: WebSockets

Designer Canvas: Fabric.js / Konva.js

Deployment: AWS + Kubernetes

## 5. Estimated Development Team

MVP Team Structure:

- 1 Project Manager
- 1 UI/UX Designer
- 2 Frontend Developers
- 2 Backend Developers
- 1 DevOps Engineer
- 1 QA Engineer
- 1 Business Analyst

Total Team Size: 8 Members

Enterprise Expansion Team:

- Senior Architect
- Additional Frontend & Backend Engineers
- AI Engineer
- Product Manager
- Support Engineers

Total Enterprise Team Size: 15–18 Members

## **6. Estimated Development Timeline**

Phase 1 — MVP: 4–6 Months

Includes:

- Quotes
- Orders
- Invoices
- Basic Storefront
- Production Tracking

Phase 2 — Commercial Release: 8–12 Months

Includes:

- Supplier Integrations
- Inventory System
- Shipping Integrations
- Multi-Store SaaS

Phase 3 — Enterprise Platform: 12–18 Months

Includes:

- AI Features
- API Ecosystem
- White-Label Infrastructure

- Advanced Analytics

## 7. Estimated Development Cost

MVP Development Cost:

USD \$135,000 – \$255,000

Commercial SaaS Version:

USD \$350,000 – \$800,000

Enterprise-Level Platform:

USD \$1M – \$3M+

## 8. Infrastructure Costs

Estimated Monthly Infrastructure Costs:

- Cloud Servers: \$500 – \$5,000
- Database Services: \$300 – \$2,000
- Storage: \$100 – \$1,500
- CDN & Monitoring: \$200 – \$1,300
- Email Services: \$50 – \$500

Estimated Total:

USD \$1,000 – \$10,000+/month

## 9. Major Technical Challenges

- Online product designer complexity
- Dynamic pricing engine
- Production workflow customization
- Multi-tenant SaaS isolation
- Large artwork file processing

- Supplier API integrations
- Enterprise scalability requirements

## **10. Competitive Landscape**

Comparable industry platforms include:

- DecoNetwork
- Printavo
- InkSoft
- OnSite Apparel Software

The proposed platform will use original architecture, branding, and workflows while providing enterprise-grade operational capabilities.

## **11. Final Recommendation**

The recommended strategy is to begin with a focused MVP containing order management, storefronts, quoting, invoicing, and production tracking. Advanced modules such as AI systems, enterprise APIs, and large-scale SaaS infrastructure should be introduced progressively. This project represents a high-complexity but highly scalable SaaS opportunity within the apparel decoration and print fulfillment industry.
